

Microphone stations

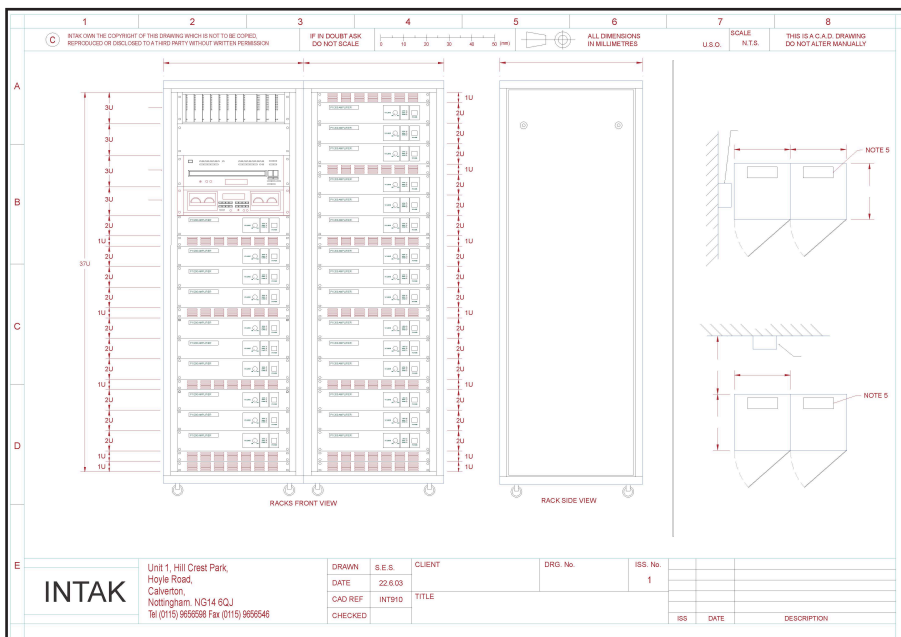

A range of standard microphone enclosures are available, including three desk top types, wall mount, and outdoor variants. These enclosures are then populated with the zone selectors and facilities specific to the project.

In addition “talkback” intercom stations can be provided, including marine grade and explosion proof types.

Loudspeakers

A full range of loudspeakers can be provided, including flush ceiling, cabinet, column, horn, sphere, and projector types.

Central rack cubicles

When based on a centralised rack format the industry standard 19” rack cubicle or cubicles are fitted with lockable glazed front doors, as well as lockable solid rear doors and side panels.

The rack top covers are also removable to allow cable glanding, alternatively the cables may enter through the bottom gland entry opening in the base.

The racks are also fitted with castors for ease of movement and transportation.
