

The **INTAK** IFCL 6 is a high quality, voice evacuation system compliant ceiling loudspeaker.

For ease of installation the steel back box enclosure is equipped with separate in/out ceramic terminal blocks, which allow the cables to be terminated at first fix, and thus allow full cable testing to take place. This is extremely helpful when using MIC cable.

The front grill with its twin cone driver can then be fitted at a later date.

The mounting brackets allows a solid fixing to either plasterboard or ceiling tiles, whilst the strong steel springs ensure the grill does not sag over time, whilst

The back box is equipped with two pre punched M20 holes to provide easy glanding facilities.

The loudspeaker is unique in being fitted with a UK made transformer, and is fully compliant with BS5839 part 8.
