## PRODUCT INFORMATION

I.R.H.L.25

Re-entrant Horn Loudspeaker

The **INTAK** IRHL 25 is a high quality, high sensitivity re-entrant horn loudspeaker for use in voice evacuation, public address, intercom, and marine talkback applications.

For ease of installation the loudspeaker can be supplied fitted with a range of cable tails, including FP, enhanced, PVC, or armored types.

When using MICC cable we can supply the loudspeaker with a cable tail ready terminated to a metal junction box.

The loudspeaker is rated IP66, and can be supplied with a painted mild steel, or stainless steel bracket, and fixings.

The loudspeaker is unique in being fitted with a UK made transformer, and is fully compliant with BS5839 part 8.

The back cover is fitted with a thermal fuse, and a ceramic terminal block to accept a four core cable tail.
