PRODUCT INFORMATION

I.V.I.S.

Intelligent Voice Intercom System

The **INTAK** I.V.I.S. intercom system provides a highly secure method of loudspeaking voice communications.

The adaptability and features of the system lend its use to many applications including;

Disabled refuge intercom

Hot line intercom

Site wide intercom

“Page/party” intercom

Marine talkback

Driller’s intercom

Muster point intercom

Security access intercom

Conveyor intercom with pre-start alarm

The **INTAK** I.V.I.S. intercom system is a centralised system, with one or more master units that allow secure access to each remote unit.

The system runs from a 24V power supply and so can be fitted with a monitored battery back up arrangement.

The master unit can be supplied in a number of enclosure types to suit the client requirements, including wall mount, desk top, rack or console mounting, weatherproof, or explosion proof.

The master unit can also be specified with either discreet, illuminated pushbuttons for remote unit connection, or a LCD display and keypad type arrangement.
